

Friends of NCBDDD Advocacy Coalition

In Support of the National Center on Birth Defects and Developmental Disabilities

March 24, 2015

The Honorable Roy Blunt
Chairman
Senate Appropriations Subcommittee
on Labor, Health and Human Services,
Education and Related Agencies
Washington, DC 20510

The Honorable Patty Murray
Ranking Member
Senate Appropriations Subcommittee
on Labor, Health and Human Services,
Education and Related Agencies
Washington, DC 20510

The Honorable Tom Cole
Chairman
House Appropriations Subcommittee
on Labor, HHS and Education
2358B Rayburn House Office Building
Washington, DC 20515

The Honorable Rosa DeLauro
Ranking Member
House Appropriations Subcommittee
on Labor, HHS and Education
2358B Rayburn House Office Building
Washington, DC 20515

Dear Chairmen Blunt and Cole and Ranking Members Murray and DeLauro:

The undersigned members of the National Center on Birth Defects and Developmental Disabilities Advocacy Coalition urge you to provide **\$ 132 million for the Centers for Disease Control and Prevention's National Center on Birth Defects and Developmental Disabilities (NCBDDD)** in the FY 2016 Labor, Health and Human Services, Education and Related Agencies Appropriations bill. Ensuring stable, adequate funding, and maintaining the programmatic focus for NCBDDD represents a sound public investment that will continue to prevent birth defects and developmental disabilities and help people with disabilities and blood disorders live the healthiest life possible.

The NCBDDD funds vital surveillance, research, and prevention activities aimed at birth defects and developmental disabilities. It also promotes health and well-being among people of all ages with disabilities and those with blood disorders. Birth defects affect 1 in 33 babies and are a leading cause of infant death in the United States. Children with birth defects who survive often experience lifelong physical and mental disabilities. In addition, over 500,000 children are diagnosed with a developmental disability each year. Nearly \$400 billion in healthcare costs each year are associated with disabilities. Blood disorders - such as sickle cell disease, anemia, and hemophilia - affect millions of people each year in the United States, cutting across the boundaries of age, race, sex, and socioeconomic status.

Unfortunately, the NCBDDD has experienced a steady erosion of funding. Since 2010, its funding has been reduced by 15%. This has resulted in, for example:

- 25% fewer families participating in CDC birth defects research and a 40% (800,000) reduction in the number of live births monitored by states. This means a slowed pace to research identifying causes of birth defects and decreased ability to track of birth defects and connect families to services.

- Over \$30 million in funding lost to connect the estimated 54 million Americans with disabilities to health programs that work.
- 31% reduction in funding for blood disorders activities, resulting in curtailed efforts to: (1) provide programs and educational materials to patients on prevention and wellness strategies for hemophilia; (2) reduce Venous Thromboembolism (VTE) – blood clots – which are among the nation’s leading causes of preventable death (causing as many as 300,000 annually), the leading cause of maternal mortality and the primary cause of wasteful hospital readmissions nationwide; and (3) better understand the breadth and public health assistance needed by those with Sickle Cell Disease and Thalassemia, which disproportionately affect minority populations.

Established by the U.S. Congress in 2000 (P.L. 106-310), the NCBDDD impacts the health of millions of our nation’s most vulnerable citizens: infants and children, people with disabilities, and people with blood disorders. It is the only CDC Center whose mission focuses on these populations. We urge you to support a funding level of \$132 million for NCBDDD programs in FY2016.

For more information, please contact the co-chairs of the Friends of NCBDDD Advocacy coalition – Annie Acosta, 202-783-2229, acosta@thearc.org; Katie Verb, 202-675-6984, k.verb@hemophiliafed.org ; or Diane Wilkinson, 202-659-1800, DWilkinson@marchofdimes.org .
